Excavating Engineer

INDEX TO VOLUME 49

(January, 1955, through December, 1955)

Excavating Engineering Publishing Co.

South Milwaukee, Wisconsin

HIGHWAY AND RAILWAY EXCAVATING AND CONSTRUCTION

	Month	Page
Combine Drives Third Tube to Weehawken Talk about high cost roadway--it comes to $100 million a mile under New York's Hudson River. Harassed motorists will call it a bargain at twice the price. A trio of old hands wins contract.	April	30
Fresno: Dirt Movin' County — by Floyd Suter Bixby Road department of California county discovers that highways get better when the earthmoving problem is worked out. Crews have perfected $3,350-a-mile construction in farm area.....	July	32
Kansas Turnpike: Yesterday's Santa Fe Trail 236-mile super road will follow same general direction as the famous trail.....	Dec.	25
Kentucky Follows Trend With 38-Mile Turnpike Though it looks as if it's in the middle of nowhere, the Kentucky Turnpike is really a much-needed highway. The four-lane divided roadway facility will be ready for traffic on January 1.....	July	24
Kiewit Solves Freeway Problems — by Ray Day Contractor develops vertical auger rigs for hole excavation when successful bid lands Ramona Freeway job with its structure foundation problems. Speedy cast-in-place piles result...	May	32
Marinucci Outwits Peat and Ledge All the problems for an advanced course in excavating are available to this firm on a 1.3-mile road job. But these men took the course years ago and they make it look pretty easy.....	Jan.	24
Roadbuilding Team Covers Lot of Ground — by Ray Day Starting with little in 1951, Pionner Construction Co. of Pueblo, Colo., now has sizable fleet of construction equipment to build good highways. It has established a fine reputation.....	Oct.	30

AIRPORT, INDUSTRIAL AND CITY EXCAVATION

	Month	Page
Academy Project Begins Shortly Construction of $125 million air force school at Colorado Springs Colo., expected to begin in June. Oklahoma engineers run soil tests. Excavation may be completed by end of the year.....	May	44
Crane Aids Tunneling for Sewer Veteran firm uses mining car system on $8-million, 4-mile project in Detroit.....	Oct.	28
Long Beach Unscrambles Its Storm Drains — by Ray Day Subsidence problems and low coastal area create design nightmare as postwar storm drain construction gains headway. Single rig digs and sets to solve space and water problems.....	Feb.	24
McHugh Erects Addition to Milwaukee Hospital The James McHugh Construction Co. handles concrete placing operations in construction of an $11 million, 11-story reinforced concrete structure with two long-boomed crawler cranes.....	Mar.	26
Pipeline in the Sand — by Ray Day Big-inch concrete storm drain leads off on construction at west end of Los Angeles International Airport as contractor, J. Tomei & Sons Construction Co., whips sandy ground problems.....	Mar.	34
Prefab Houses Go Up In Hurry Erection crews are kept busy by Pikesville (Md.) firm, Precision Built Homes, which sold about 800 of its assembly line structures last year and expect to find market for 1,000 this year.....	June	36
The Courthouse of Civic Center — by Ray Day Los Angeles adds a new courthouse to its beautiful Civic Center. Excavating contractor gets interesting workout on foundations. Excavation on $5 million project is 550,000 yards.....	July	38
Wisconsin Firm a Thriving 81 Cunningham Brothers of Beloit, organized in 1874, has operated under one ownership as long as any general contractor in the U.S. Company's marks widely visible in city of 30,000.....	June	30

WATER AND POWER SUPPLY EXCAVATION AND DAM CONSTRUCTION

Fort Randall Dam Enters Final Stages $200 million project has flood control as its primary objective, features 28-million yd. earth fill, powerhouse, outlet works and spillway . . . is part of Missouri River Basin Project.....	Feb.	16
How to De-Rock a Tailrace Cabinet Gorge Dam rises 208 feet between almost vertical rock cliffs in the Clark Fork River. Here's how the private power company owners keep the tailrace free of rock accumulation.....	Apr.	28
ICA Builds The Zicuiran Dam — by Mary Saint Albans Large rock fill structure is scheduled to be completed by the end of 1956. It will raise standard of living for residents in a former backward region of the Mexican state of Michoacan.....	Oct.	22

	Month	Page
Japan Promotes Hydroelectric Power — by Earle R. Edmiston A 5 million kilowatt power output boost in 5 years; that's the ambitious Japanese program now in works. Goal will cost $2½ billion. U.S. men and machines take key construction role.....	Mar.	20
Tough Tailracing at Chief Joseph — by Art W. Campbell, Project Engineer, Columbia River Constructors, with Ray Day It's a million yard fight with mean formations and a meaner river as Columbia River Constructors cut final channel to free water from one of world's great hydroelectric powerhouses.....	June	20
Water for the Foothills — by Ray Day Critical water shortage is nipped one jump ahead of the sheriff as southern California water district moves fast to install brand new distribution line through tricky residential area.....	Jan.	18

PIPELINING

Pipeline Loop Program Progresses The $83 million Texas-to-New York main line looping program involves eight separate construction projects as part of Transcontinental Gas Pipe Line Corporation's expansion program.....	Sept.	25
U.S.-Canadian Crews Build Alcan Pipeline Rugged conditions - snow, ice, muskeg, frigid weather and wilderness - slowed but never stopped progress on the Corps of Engineers' $40 million Haines to Fairbanks (Alaska) pipeline..	Nov.	32

MISCELLANEOUS

Canal Gives Texas a New Seaport — by Ruel McDaniel Kenyon Dredging Co. orders special barge built for Bucyrus-Monighan 6160 dragline, then digs flotation canal as it dredges entire seven miles of barge channel to a new chemical plant.....	Sept.	44
Draglines Float to Seaway Badgett Mine Stripping Corp., awarded 4 million-yard earth moving job on Seaway project, floats 450-W and 5-W machines 2,000 miles, from Kentucky coal fields to Massena, N. Y.....	Aug.	42
It's 50 Candles for Excavating Engineer Although our publication has changed since the first issue, the industry itself has experienced a lot more change. Here's our philosophy at the five-decade birthday.....	Jan.	16
Workhorse of the Lakes — by Ray Day Forty years ago the dredge Gaillard was launched at Green Bay, Wis. Today this forerunner of modern excavating equipment still works efficiently - and its end is not in sight.....	Nov.	40

DRAINAGE, IRRIGATION, RECLAMATION AND FLOOD CONTROL

Machines Help Tame Big Muddy — by Ray Day Traditional dike and revetment work along lower Missouri River changes radically. Quarry, dikeline-ballast work, formerly done by 300-man labor crews, is handled by machines and 32 men.....	Sept.	34
Rebuilt River — by Ray Day When vegetation choked up Rio Grande channel, Bureau of Reclamation engineers conceived a unique construction plan to restore New Mexico River to new peak of hydraulic efficiency.....	April	21

OPEN PIT MINING AND DREDGING

	Month	Page
Akremite: Firm's Answer to High Blasting Costs The Maumee Collieries Co. of Terre Haute, Ind., has hit paydirt in the development of an open pit explosive which greatly reduces the cost of blasting, yet is safe and effective.....	Dec.	30
Georgian Wildcats for Iron Ore You need a gambler's temperament to be happy mining Georgia's brown hematite. It's elusive stuff. Yet John Hodge has been making a pretty good business of it since 1942.....	Nov.	24
Kaiser Modernizes Eagle Mountain — by Ray Day West's biggest iron ore mining operation gets a boost in production as newest rotary drill, extra shovel equipment and beneficiation plant are added to spread of Kaiser Steel Corp.....	Aug.	34
Wheel Excavator: Coal Stripping Tool with a Future The wheel excavator comes of age with Bucyrus-Erie's new machine. It is the first unit built from the ground up for wheel excavator service. Truax-Traer Coal Co. puts wheel to work.....	May	21

QUARRIES, SAND AND GRAVEL

	Month	Page
Firm Blasts in Unusual Pattern New Jersey Quarry, in populous area, uses short-period delay caps, good stemming.....	Aug.	44
It's Feast, Fame, Efficiency for Quarry — by Floyd Suter Bixby J. B. Stringfellow Co. deals in all three as it specializes in quarrying derrick and rip-rap rock for public works jobs in California. Firm constructs heavy, 2,100-ft. sea wall.....	Aug.	28
Lime Plant Ups Efficiency — by Ray Day Utah Lime & Stone Co. meets the demands of a busy market by combining new and old quarrying methods with sound lime burning techniques. Shovel, 24 years old, keeps busy schedule.....	Dec.	36

MAINTENANCE, PRODUCTION, EFFICIENCY AND SAFETY

	Month	Page
Rope Changing on Large Excavators — by N. Wilson, Mechanical Superintendent, The Electricity Trust of South Australia, Adelaide, S. A. A few tools help cut down-time required to change large walking dragline's wire ropes. Here's the procedure followed in the coal mines of The Electricity Trust of South Australia.....	Feb.	34
Save Time, Money on Alaska "Igloo" Project New method of forming and erecting concrete panels for ammunition storage structures at Fort Richardson, Alaska, Army base is handled by contractor, Morrison-Knudsen Co., Inc.....	Jan.	30
